

# West Yorkshire Geology Trust

## Local Geological Sites Monitoring Form

Site information	
Site Name	
Date of visit	
Name of visitor	
Grid reference (if known)	

Previous visits	
If you've visited before has there been any changes since your last visit?	
If yes, what are the changes?	

Primary impacts			
Is (are) the LGS feature(s) still clearly visible?			
If no, what is causing the problem?			
Are any of the following affecting the LGS feature(s)?			
Vegetation		Agricultural practices	
Rockfalls/landslips		Flood defences	
Flooding		River management	
Litter/dumping of waste		Erosion protection works	
Quarrying or engineering		Development activities	
Other impacts (please define)			
Please write any additional notes about the primary impacts you think may be useful to us			

Secondary impacts			
These are factors which don't directly affect the LGS but can contribute to a less than desirable condition for the site and for visitors.			
Are any of the following affecting access to the LGS?			
Vegetation and other obstacles		Landowner permissions	
Physical obstacles (fences, walls etc)		Protected flora and fauna	
Other impacts (please define)			
Are any of the following present and in an undesirable condition?			
Interpretation boards		Benches, fences or gates	
Earthworks			
Other impacts (please define)			
Please write any additional notes about the Secondary impacts you think may be useful to us			

Photos
Photos of the site and any problems you've identified are extremely useful and we'd welcome any. Please could you try and include a grid reference, orientation and a brief description of the photo.

Please send completed forms and photos to [sites@wyorksgeologytrust.org](mailto:sites@wyorksgeologytrust.org)
